

Trailblazing Metadata: a diachronic and spatial research platform for object-oriented analysis and visualisations

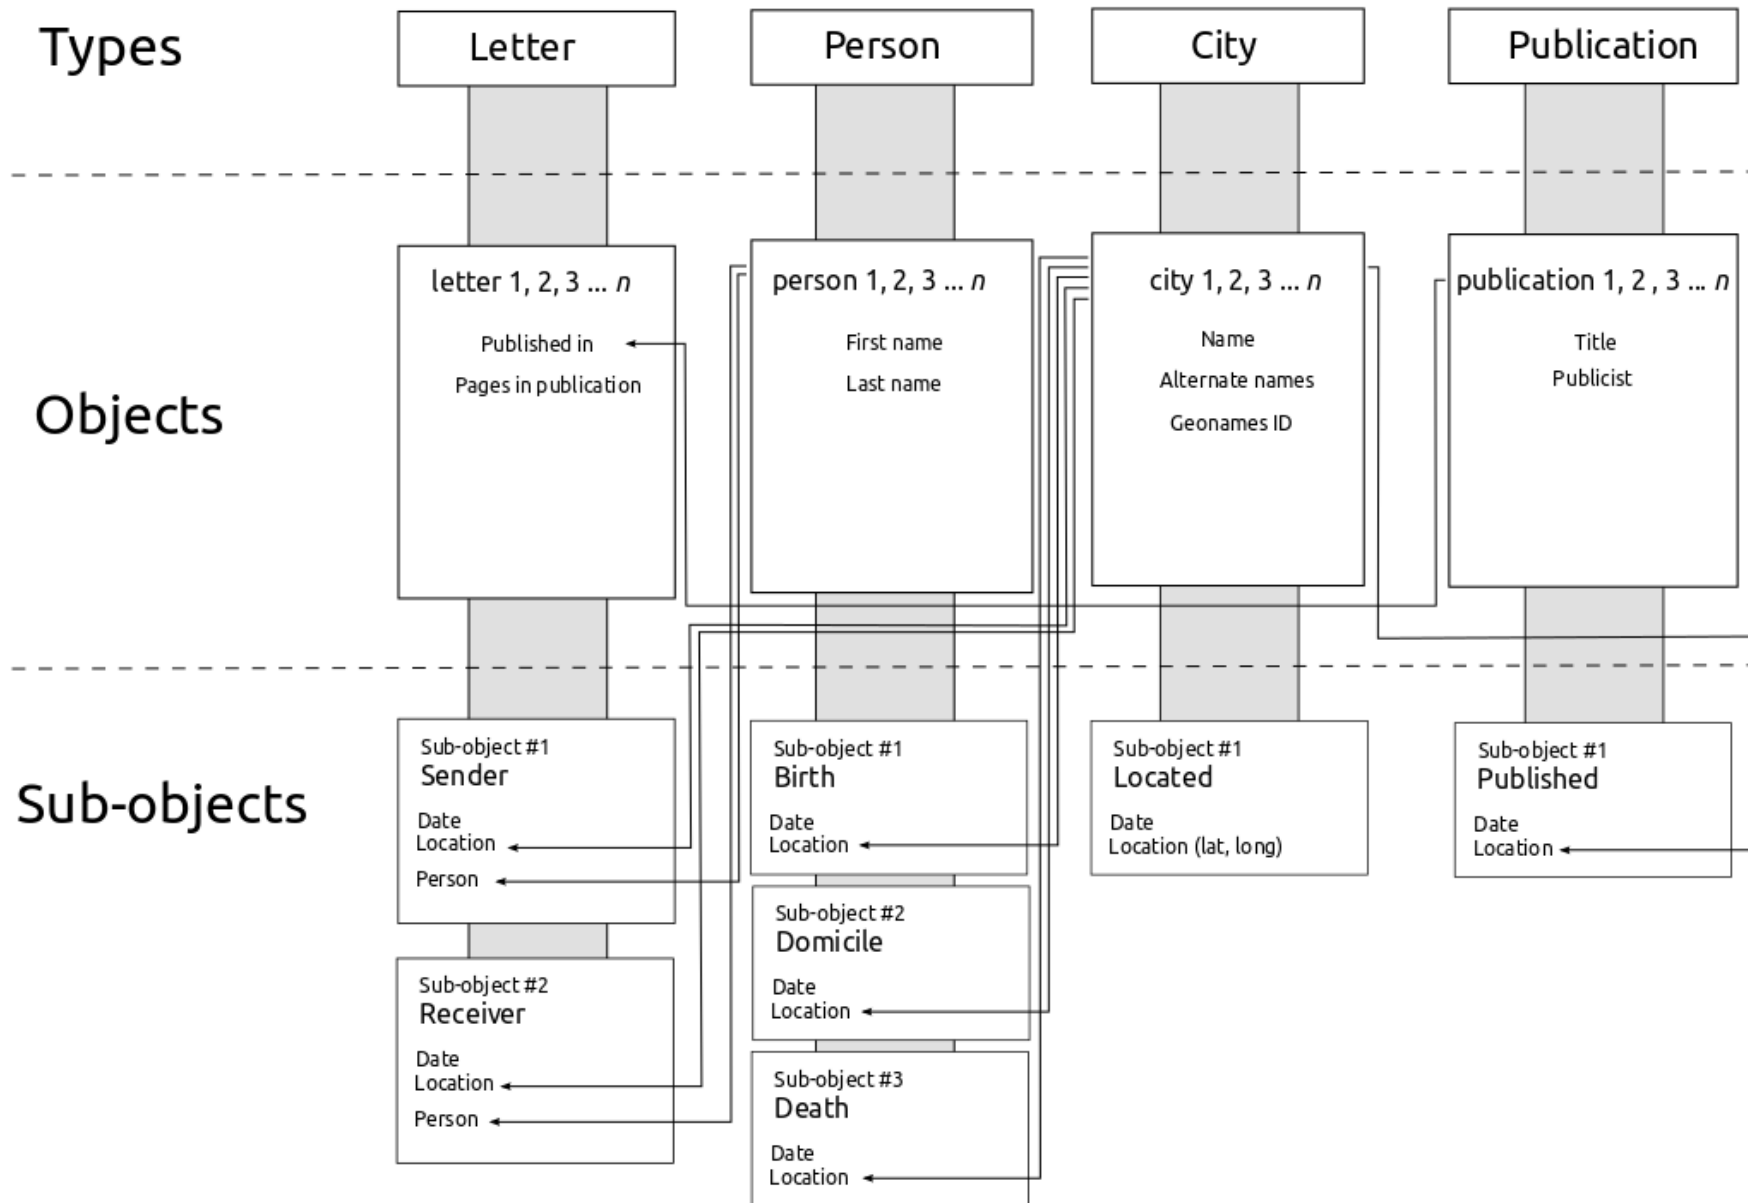

Pim van Bree & Geert Kessels

Outline

- Background
- Infrastructure of the Platform
- An Object-oriented Approach
- Next Steps

Chrono Spatial Research Platform

- Data design
- Data entry
- Data management
- Data analysis
- Data visualisation

Chrono Spatial Research Platform

- Data design
- Data entry
- Data management
- Data analysis
- Data visualisation

An object oriented approach

- Meta data driven
- Persistently relational
- Bottom – up
- Assemblage of objects

Next Steps

- New projects running on the platform
- New functionalities:
 - Content driven time line
 - Analysing 'Disconnected Nearness'
 - SNA methods
